Development Notes

- Development based on J23NA023-AVSPEC ROOMS-REV_04

- Specification description of Multipurpose & Atelier is considered to have been superseded by section 4.1 of the above document

- Faders set to minimum will also be muted to prevent unusable 'quiet zones' in fader ranges

- Design artifacts such as green plus icons on buttons, partially filled gauges/sliders, selection borders, etc. are from the design software and will not appear in final product

- Signage content to be provided by others
